

George Owens Nature Park

George Owens Nature Park has provided families with the opportunity to reconnect with their natural environment since 1977.

The 86.5 acre park is open year round and is made up of four distinct natural communities – mixed upland forest, lake / wetland, old growth forest, and glade.

Popular seasonal activities include hiking, fishing, picnicking, wildlife viewing, geocaching, relaxing in one of the quiet areas of the park or creating your own natural adventure.

Visit us in the Nature Center or at www.georgeowensnaturepark.org to learn more about outdoor family activities.
